PROFESSIONAL SUMMARY

Backend-focused Full Stack Developer with 1+ year of experience building production REST APIs with Python (FastAPI) and Node.js (Express.js), designing PostgreSQL and MongoDB schemas, and shipping React and Angular interfaces. Delivered data-heavy systems for property survey management, GIS visualization, and weather analytics, with strong focus on data integrity, authentication, role-based access control, and clean API design. Seeking a Backend or Full Stack Developer role at a product-based company.

TECHNICAL SKILLS

Backend: Python, FastAPI, Node.js, Express.js, REST API Design and Development, JWT Authentication, Role-Based Access Control (RBAC), System Design Fundamentals
Databases: PostgreSQL, MySQL, MongoDB, Redis, Schema Design, Data Modeling
Frontend: React.js, Angular, TypeScript, JavaScript (ES6+), Redux, Context API, HTML5, CSS3, Tailwind CSS, Bootstrap
Tools and Cloud: Git, GitHub, AWS (basics), Google Cloud (fundamentals), Postman
Core CS: Data Structures and Algorithms, Object-Oriented Programming (OOPS)

PROFESSIONAL EXPERIENCE

Software Developer | ML Infomap Pvt. Ltd., Delhi NCR, India | Jul 2025 to Present

- Built and maintained RESTful APIs with FastAPI (Python) and Node.js/Express.js covering user authentication, CRUD operations, and role-based access control.
- Designed PostgreSQL schemas and data models and managed the database for the Korba Property Application backend.
- Engineered re-survey logic for a property survey management system: regenerating survey_id and refreshing the composite property_uid (parcel_no + property_id) consistently across all related tables while keeping existing_property_id immutable.
- Implemented a reusable repoint_property_uid helper that updates ParcelMaster, all mapped models, LandBuildingArea, and DocumentsCollected, and sequenced it ahead of the section upsert loop to preserve data integrity.
- Developed full-stack web applications with React.js, Angular, Node.js, and MongoDB; optimized frontend performance and built responsive UI components.
- Collaborated with backend, frontend, and GIS teams to deliver features, integrate APIs, and resolve production issues.

PROJECTS

Property Survey Management System and Korba Property Application | Python, FastAPI, PostgreSQL

- Developed backend APIs, database models, and schema for a property survey platform handling parcel, property, and document records.
- Built re-survey and data repointing workflows that keep identifiers consistent across multiple tables.

GIS-Based Visualization Module | ML Infomap

- Built a GIS-based visualization module to display survey and property data spatially.

Daily Task Reporting and Tracking System | ML Infomap | Jan 2026 to Present

- Designed an internal system for daily task submission, report tracking, and project distribution, with RESTful APIs and automated status tracking for delayed or missing submissions.

Weather Intelligence and Alert System | Angular, Python, FastAPI, Redis | Indus Towers

- Integrated live weather APIs for state-wise and district-wise reports and built 7-day and 24-hour forecast dashboards in Angular.

Prabhavi AI Web | React.js, Node.js, MongoDB, OpenAI API | Live: vishal368-singh.github.io/PrabhaVi-AI

- Built a web-based AI utility platform integrating third-party APIs (background remover, image enhancer, image compressor) behind a unified interface.

EDUCATION

B.Tech, Computer Science and Design | RR Institute of Modern Technology, Lucknow | 2021 to 2025 | CGPA: 8.28

CERTIFICATIONS

Google Cloud Computing Foundations (NPTEL) | Introduction to Artificial Intelligence (Udemy, 2026) | DSA with Java (Apna College) | Web Development Bootcamp (Udemy) | Python Programming (LearnVern)
